

# Omnis Developer Partner Program

Your guarantee of superior Omnis products and services

## Program Highlights

The **Omnis Developer Partner Program (ODPP)** provides you with everything you need to develop and deploy Omnis Studio applications as quickly and as easily as possible, giving you excellent value for money and a valuable return on your investment in Omnis technology. In brief, for each developer in the program, the ODPP provides:

- **1x Omnis Studio SDK**
- **Free upgrades & updates for each SDK**
- **Unlimited Technical Support**
- **Discounts on other products & training**
- **Exclusive fault reporting & tracking**

## Everything you need in one package...

Using Omnis Studio enables you to create enterprise and web applications in a much shorter time frame and with fewer resources than many other development tools. If you intend to use Omnis Studio over the long term as your main application development tool, the most beneficial and cost effective developer support option for you is the Omnis Developer Partner Program. The ODPP has several levels to fit your needs, and offers the best combination of software development products and range of support services including:

- **Software** One copy of the latest Omnis Studio SDK with a full development license for each named developer covered by the program (SDK license is one Omnis Studio Web Edition per developer for Windows, Mac OS X, and Linux, available for download or on DVD), plus one printed copy of the Omnis Studio documentation set.
- **Upgrades** Free major release upgrades and minor release updates for all Omnis Studio SDK licenses covered by the program, plus free minor release updates for all Omnis Studio deployment (runtime) licenses.
- **Support** Unlimited one-to-one telephone and e-mail access to our world-class technical support team during business hours. Higher program levels provide technical backup from the Omnis engineering team and guarantee faster support response times.
- **Discounts** Substantial discounts on deployment (runtime) licenses and additional Omnis components, as well as Omnis training and consultancy services. You'll also receive a copy of the Quick Start self-study training course in PDF format free of charge when you signup for the program.

- **Added Value** Exclusive online access to eBug which allows you to report faults in Omnis and search the status of your reported faults. Plus, participation in Beta programs for major new versions of Omnis Studio and new components is available only to developers in the ODPP.

## A program level that suits you...

The ODPP is available for single developers, as well as teams of multiple developers, and provides significant benefits and cost savings when compared to purchasing the Omnis Studio package outside of the program. The ODPP consists of several program levels, which can be purchased for an annual fee outlined in the Omnis Price list provided by your Raining Data sales representative.

Program level	No. of developers/SDKs
<b>SOLO</b>	<b>1</b>
<b>TEAM I</b>	<b>3</b>
<b>TEAM II</b>	<b>5</b>
<b>PREMIER I</b>	<b>7</b>
<b>PREMIER II</b>	<b>9</b>
<b>TOP</b>	<b>15</b>
<b>STAR</b>	<b>20</b>

Each program level provides exactly the same quality of technical support for every named developer in the program, however the more developers you have in the program, the more benefits you receive and greater discounts on additional products and services you get. For the higher levels of the program (TEAM I or above), you also receive free Omnis training and one or more days free consultancy to help you with your Omnis development projects.

## FAQs

**What is the difference between an upgrade and an update?** An upgrade or major release is like moving from Studio 3.x to 4 while an update is like moving from Studio 4.1 to 4.2. As an ODPP member, you will receive upgrades and updates free of charge for each developer license covered by the program, plus you get free updates (but not major upgrades) for your Deployment (runtime) licenses.

Please contact your local Raining Data sales representative for full details about the ODPP options available in your region as well as Terms & Conditions, or see [www.omnis.net](http://www.omnis.net) for more information.
